BS 1088 Marine Plywood

Marine Plywood, manufactured in accordance to the international standard BS 1088, is an excellent choice where a flat and stable panel is required. Utilising high quality hardwood veneers, this plywood is produced from very thin veneers that contain negligible splits or knots resulting in a quality panel. Applications vary from traditional boat building applications to projects that require durable and high face grade panels.

Specifications...

Name: Marine Plywood - BS 1088

Glue Bond: Type 'A' Bond Phenol Formaldehyde

Standard: British Standard 1088
