ECHOPANEL®

DISTRIBUTED BY

ECHOPANEL®

EchoPanel[®] is the original decorative interior panelling solution, with acoustic qualities and eco-innovation at its core.

EchoPanel[®] reduces and controls reverberated noise in shared environments, making it ideal for use in a variety of commercial interior spaces including workplace, education and hospitality environments.

It is a streamlined product with a fabric-like finish, designed with dematerialisation in mind. Once it's been installed, there is no need to upholster, paint or protect it.

Pioneering the war against single-use plastic, EchoPanels® production uses post-consumer recycled PET bottles to create a superior upcycled product with a vast array of interior applications.

EXTENSIVE PRODUCT RANGE

EchoPanel® offers the largest colour palette on the market. The solid colour remains consistent throughout the thickness of the panel, so you can cut, create and install without the need for edging or capping.

EchoPanel[®] also boast an extensive range of inspiring prints and precision cut designs, making it the go-to brand for creative Architects and Interior Designers.

Offered in 3 panel thicknesses; 24mm, 12mm and 7mm.

The 12mm and 7mm thicknesses are now available in larger panel sizes (2800mm x 1200mm¹) for seamless floor to ceiling applications.

APPLICATIONS

EchoPanel[®] is durable, lightweight, and easy to cut and install, making it ideal for a multitude of wall, ceiling and freestanding interior applications. Frequent installations include:

- Wall Panelling. Direct fix installation or create an air gap for greater acoustic performance.
- Ceiling Applications. Direct fix or suspended systems.
- Workstations. Its slender, pinnable nature enables it to be used as a double-sided division in a workstation.

The 12mm and 7mm thicknesses are now available in larger panel sizes (2800mm x 1200mm) for seamless floor to ceiling applications.

ACOUSTIC CONTROL

Controlling reverberated noise is a crucial factor in creating comfortable and productive environments, be it a professional workplace, learning environment, social setting or retail space.

EchoPanel[®] is optimised for acoustic performance and has been independently tested, in accordance with AS ISO 354, to achieve a Noise Reduction Coefficient (NRC) rating to meet your projects acoustic requirements, be it a new building or interior refurbishment.

DESIGNED FOR COMMERCIAL INTERIORS

EchoPanel[®] has undergone many forms of industry testing and complies with some of the world's highest mandatory standards.

Its fire-retardant properties have been developed so that it is an excellent performer in the safety arena. It holds first-class ratings in Australasian and International markets, achieving a Group 1 rating in the 'ISO 9705' full-scale room fire test. EchoPanel® 12mm has also been awarded a valuable 'GB 8624 B1 level', and the internationally recognised 'BS EN 13501.1: Classification B-s1, d0'.

¹ Manufacturing tolerances apply

Dematerialisation, recycling, upcycling and life cycle management were, and still are, at the foundation of EchoPanels® design.

Made from 60% post-consumer waste, sourced from singleuse PET bottles, EchoPanel® products are dedicated to the environment. Aside from saving tonnes of plastic waste from our oceans and landfill, the PET is converted into EchoPanel® which boasts a 10-year life expectancy, after which the material is still 100% recyclable.

EchoPanel® is only printed with environmentally sensitive pigment inks to deliver excellent light fastness while remaining low-VOC, non-flammable and non-toxic.

Impressively, in 2018/19, Woven Image diverted in excess of 624 tonnes of PET plastic from landfill. This equates to over 31 million waste bottles being repurposed into EchoPanel® products annually.

To date, over 230 million 600ml PET bottles have been diverted from landfill to produce EchoPanel.®

ENVIRONMENTAL CERTIFICATION

EchoPanel[®] achieves Global GreenTag[™] certification (Green Rate Level A) with the maximum Product Health Declaration™: Platinum Health, for EchoPanel® plain colours.

To date, over 230 million 600ml PET bottles have been diverted from landfill to produce EchoPanel[®] products.

Furthermore, EchoPanel® can secure credits under the following sustainable building rating tools:

- Green Star, as administered by Green Building Council • Australia.
- WELL[™] Building Standard, International WELL
- Building Institute. •
- Leadership in Energy and Environmental Design (LEED v4.1).

EchoPanels® acoustic gualities, along with its extensive colour, design and customisation properties, offers designers the freedom to create stylish, unique and sustainable interior spaces.

PRODUCTION PROCESS

1. Soft drink and detergent bottles made from PET identified by Δ are collected from consumers

3. Pellets are washed and sanitised

5. Resin is pumped through a sophisticated shower-rose device, known as a spinneret

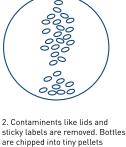

7. Fibres are drawn and cut and are blended into a web

 $^{\circ}$

4. Pellets and colour are fed into a

hopper. A heater at the base of the hopper melts the pellets to form a

free flowing resin

6. Cold air fans 'set' the fine fibres extruded from the spinneret

8. Web is compressed to make panel board ready for use

AUSTRALASIA ENVIRONMENTAL PRODUCT DECL/

ECHOPANEL® COLOUR RANGE

EchoPanel[®] is available in a comprehensive range of neutral, mid tone and vibrant colours. Due to its unique manufacturing process, the colour remains consistent throughout the depth of the panel.

The standard 12mm range includes all 31 colours, with a selection of these colours also available in 7mm and 24mm thicknesses.

Colours shown are for reference only, please contact Hurford's for a sample prior to ordering.
